Sir:

Entry of the amendments below and consideration of the following remarks is respectfully requested.

**PRELIMINARY AMENDMENT**

Please amend the title page as follows:

Please delete the title starting at line 5 and insert  
therefore:

# COMPOSITIONS AND METHODS FOR PRODUCING ENHANCED ANTIBODIES

Please amend the specification as follows:

001122	001123	001124	001125	001126	001127	001128	001129	001130	001131	001132	001133	001134	001135	001136	001137	001138	001139	001140	001141	001142	001143	001144	001145	001146	001147	001148	001149	001150	001151	001152	001153	001154	001155	001156	001157	001158	001159	001160	001161	001162	001163	001164	001165	001166	001167	001168	001169	001170	001171	001172	001173	001174	001175	001176	001177	001178	001179	001180	001181	001182	001183	001184	001185	001186	001187	001188	001189	001190	001191	001192	001193	001194	001195	001196	001197	001198	001199	001200	001201	001202	001203	001204	001205	001206	001207	001208	001209	001210	001211	001212	001213	001214	001215	001216	001217	001218	001219	001220	001221	001222	001223	001224	001225	001226	001227	001228	001229	001230	001231	001232	001233	001234	001235	001236	001237	001238	001239	001240	001241	001242	001243	001244	001245	001246	001247	001248	001249	001250	001251	001252	001253	001254	001255	001256	001257	001258	001259	001260	001261	001262	001263	001264	001265	001266	001267	001268	001269	001270	001271	001272	001273	001274	001275	001276	001277	001278	001279	001280	001281	001282	001283	001284	001285	001286	001287	001288	001289	001290	001291	001292	001293	001294	001295	001296	001297	001298	001299	001300	001301	001302	001303	001304	001305	001306	001307	001308	001309	001310	001311	001312	001313	001314	001315	001316	001317	001318	001319	001320	001321	001322	001323	001324	001325	001326	001327	001328	001329	001330	001331	001332	001333	001334	001335	001336	001337	001338	001339	001340	001341	001342	001343	001344	001345	001346	001347	001348	001349	001350	001351	001352	001353	001354	001355	001356	001357	001358	001359	001360	001361	001362	001363	001364	001365	001366	001367	001368	001369	001370	001371	001372	001373	001374	001375	001376	001377	001378	001379	001380	001381	001382	001383	001384	001385	001386	001387	001388	001389	001390	001391	001392	001393	001394	001395	001396	001397	001398	001399	001400	001401	001402	001403	001404	001405	001406	001407	001408	001409	001410	001411	001412	001413	001414	001415	001416	001417	001418	001419	001420	001421	001422	001423	001424	001425	001426	001427	001428	001429	001430	001431	001432	001433	001434	001435	001436	001437	001438	001439	001440	001441	001442	001443	001444	001445	001446	001447	001448	001449	001450	001451	001452	001453	001454	001455	001456	001457	001458	001459	001460	001461	00146

COMPOSITIONS AND METHODS FOR PRODUCING ENHANCED ANTIBODIES

On page 14, please delete footnote 2 starting at line 11 and ending at line 12, and insert therefore:

✓<sup>2</sup> Residue numbering follows the nomenclature of Chothia et al.,  
*supra*

On page 16, please delete the paragraph starting at line 10 and insert therefore:

As used herein, the term "functional fragment" when used in reference to Vitaxin, to a LM609 grafted antibody or to heavy or light chain polypeptides thereof is intended to refer to a portion of Vitaxin or a LM609 grafted antibody including heavy or light chain polypeptides which still retains some or all of the  $\alpha_v\beta_3$  binding activity,  $\alpha_v\beta_3$  binding specificity and/or integrin  $\alpha_v\beta_3$ -inhibitory activity. Such functional fragments can include, for example, antibody functional fragments such as Fab, F(ab)<sub>2</sub>, Fv, single chain Fv (scFv). Other functional fragments can include, for example, heavy or light chain polypeptides, variable region polypeptides or CDR polypeptides or portions thereof so long as such functional fragments retain binding activity, specificity or inhibitory activity. The term is also intended to include polypeptides encompassing, for example, modified forms of naturally occurring amino acids such as

AI covered -  
D-stereoisomers, non-naturally occurring amino acids, amino acid analogues and mimetics so long as such polypeptides retain functional activity as defined above.

On page 64, please delete the paragraph starting on line 1, and insert therefore:

AA 109020-06300000  
Grafted LM609 heavy and light chain V regions were constructed by mixing 5 overlapping oligonucleotides at equimolar concentrations, in the presence of annealing PCR primers. The heavy chain oligonucleotides map to the following nucleotide positions: V<sub>H</sub> oligonucleotide 1 (V<sub>H</sub> oligo1), nucleotides (nt) 1-84; (SEQ ID NO:9); V<sub>H</sub> oligo2, nt 70-153, (SEQ ID NO:10); V<sub>H</sub> oligo3, nt 139-225 (SEQ ID NO:11); V<sub>H</sub> oligo4, nt 211-291 (SEQ ID NO:12); V<sub>H</sub> oligo5, nt 277-351 (SEQ ID NO:13). Similarly, the Vitaxin light chain oligonucleotides map to the following nucleotide positions: V<sub>L</sub> oligonucleotide 1 (V<sub>L</sub> oligo1), nucleotides (nt) 1-87; (SEQ ID NO:14); V<sub>L</sub> oligo2, nt 73-144, (SEQ ID NO:15); V<sub>L</sub> oligo3, nt 130-213 (SEQ ID NO:16); V<sub>L</sub> oligo4, nt 199-279 (SEQ ID NO:17); V<sub>L</sub> oligo5, nt 265-321 (SEQ ID NO:18). The nucleotide sequences of oligonucleotides used to construct grafted LM609 heavy and light chain variable regions are shown in Table 6. Codon positions 49 and 87 in V<sub>L</sub> oligo3, and V<sub>L</sub> oligo4 represent the randomized codons. The annealing primers contained at least 18 nucleotide residues complementary to vector sequences for efficient annealing of the amplified V region product to the single-stranded vector. The annealed mixture was fully converted to a double-stranded molecule with T4 DNA polymerase plus dNTPs and ligated with T4 ligase.

Please insert new pages 101 through 130 and renumber original pages 101 through 116 as pages 131 through 146, respectively.

Please amend the claims as follows:

Cancel claim 1 without prejudice. Add new claims 105-117 as follows:

80. A grafted antibody, or functional fragment thereof, comprising an association rate constant ( $k_{on}$ ) greater than  $1.4 \times 10^6 \text{ M}^{-1} \text{ sec}^{-1}$ .

81. The grafted antibody, or functional fragment thereof, of claim 80 further comprising an association constant ( $K_a$ ) greater than  $5 \times 10^9 \text{ M}^{-1}$ .

82. The grafted antibody, or functional fragment thereof, of claim 80, wherein said  $k_{on}$  is greater than  $2.7 \times 10^6 \text{ M}^{-1} \text{ sec}^{-1}$ .

83. The grafted antibody, or functional fragment thereof, of claim 82 further comprising an association constant ( $K_a$ ) greater than  $1.0 \times 10^{10} \text{ M}^{-1}$ .

84. The grafted antibody, or functional fragment thereof, of claim 80, comprising a humanized antibody, or functional fragment thereof.

Serial No.: Herewith  
Filed: Herewith  
Page 8

85. A method for producing an enhanced antibody, or functional fragment thereof, comprising:

(a) modifying a parent antibody, or functional fragment thereof;

(b) obtaining one or more variant antibodies, or functional fragments thereof, said one or more variant antibodies, or functional fragments thereof, comprising one or more amino acid substitutions in one or more variable regions compared to said parent antibody, and

(c) measuring the association rate constant ( $k_{on}$ ) of said one or more variant antibodies, or functional fragments thereof, to an antigen, wherein a variant antibody, or functional fragment thereof, having an association rate to an antigen that is 4-fold higher or greater compared to the rate of said parent antibody binding to said antigen is an enhanced antibody, or functional fragment thereof.

86. The method of claim 85, further comprising isolating said enhanced antibody, or functional fragment thereof.

87. The method of claim 85, wherein said one or more amino acid substitutions are in one or more CDRs.

88. The method of claim 85, wherein said one or more amino acid substitutions are in one or more framework regions.

89. The method of claim 85, wherein said amino acid substitutions are in one or more CDRs and one or more framework regions.
